Seasonal Work Survey

The purpose of this survey is to locate families who may be eligible for the federally funded **Migrant Education Program**, which provides academic support to students whose home or school life is interrupted by migratory activities such as fishing, logging or agriculture.

1. During the past three years, have any of your children (birth to graduated) made an overnight trip with you, with someone at least 14 years old, or on their own for one of the following activities:

- Commercial or subsistence fishing
- Work in a cannery, fish processor or seafood farm?
- Logging (with a logging company)
- Harvesting crops or animals (this may include berry picking in some instances)

2. Do these activities provide a main source of income for your family? Yes___ No___

3. Did the activities above require your child(ren) to cross school district boundaries or travel at least 20 miles, one way, from his or her residence to the location of the work? Yes___ No___

4. Did the activities require your child(ren) to be away from home for a total of 7 nights/8 days? Yes___ No___

If you answered yes to the questions above, a migrant recruiter may contact you to find out if your child is eligible for the Migrant Education Program. Final eligibility determination is made by the Alaska Migrant Education Office. Only one survey per family needed.

Family Information*	*Only one survey per family is required
Parent/Guardian	
Phone Number	
Best time to call	
Names and grades of child(ren)	
Dates away from residence:	

Please return to your school secretary.
